NUK is a specialised manufacturer solely for people that have nephrostomy catheters.

Each and every person with a Nephrostomy is an individual with different needs and requirements, which is why it is so important to have choice and flexibility in the medical device they choose and use.

NUK spends a lot of time listening to nephrostomy patients, and to healthcare professionals, to find out how we can improve our products and develop new ones.

Nexus is available on UK prescription through all NHS dispensers from pharmacies to home delivery services in addition to our home delivery partner **Vyne** (see back of catalogue).

What is a nephrostomy

A nephrostomy catheter (sometimes called a nephrostomy tube) is a tube that is put through the patients skin directly into the kidney to drain the urine collecting in their kidney into an externally worn drainage system.

A nephrostomy is essential when something is blocking the normal flow of urine from the kidney to the bladder or if there are complication with the bladder. Without this intervention doctors have determined that urine will stay in the kidney and cause damage.

Nephrostomies can be for a temporary period of time or permanent depending on the medical condition. This is not a decision taken by the family doctor but will normally be decided by a hospital consultant in charge of the patients care following various tests and scans.

For a more detailed explanation and description of how the urinary system works see our website:
www.nephrostomy.co.uk/what-is-a-nephrostomy

Nephrostomy Kits

NX1S

Our **Nexus single Inlet Drainage System starter pack** (**NX1S**) is designed for patients with either a single or bilateral nephrostomy. For patients that have bilateral catheters they need to wear a single drainage bag for each catheter. Pack includes everything needed to get started with the system.

Nexus Nephrostomy Single Inlet Drainage System (NX1S) includes:

- 1 x 50mm wide trim to fit washable long elasticated waist belt
- 2 x washable waist belt suspenders
- 1 x 38mm wide trim to fit washable elasticated thigh strap with repositionable bag tape
- 4 x 560ml drainable sterile **NEXUS** bags with soft touch backing (night bag connector attached)
- Each bag packed with 1 x short and 1 x long extension tube

Product code	PIP code	Product Description	Quantity	DT PRICE
NX1S	423-7095	Nexus single or bilateral starter pack	4x Adjustable Single Bags 1x Nexus Belt Pack	£35.30/pack

KEY FEATURES:

- Full nephrostomy kit, including bags & fixation
- Supports hip, waist or thigh fixation
- Drainage bag extension tubes included
- Washable waist belt and thigh strap
- This kit gives single nephrostomy patients 4 weeks use and bilateral nephostomy patients 2 weeks use

Nephrostomy Kits

NX2S

Our **Nexus Twin Inlet Drainage System starter pack** (**NX2S**) is designed for patients with bilateral nephrostomy catheters only. It is suited to those who wish to wear a single drainage bag with a 'Y' connector. Pack includes everything needed to get started with the system.

Nexus Nephrostomy Twin Inlet Drainage System (NX2S) includes:

- 1 x 50mm wide trim to fit washable long elasticated waist belt
- 2 x washable waist belt suspenders
- 1 x 38mm wide trim to fit washable elasticated thigh strap with repositionable bag tape
- 2 x 560ml drainable sterile **NEXUS** bags each with a twin inlet tube
- Each bag packed with 1 x short and 1 x long extension tube

Our Nephrostomy kits have significant cost savings for the NHS, particularly when our bilateral option is used effectively, halving costs and **reducing PVC waste by 50% per patient.**

50% SAVINGS PER PATIENT

Nephrostomy Bags

NX1Bag
NX2Bag

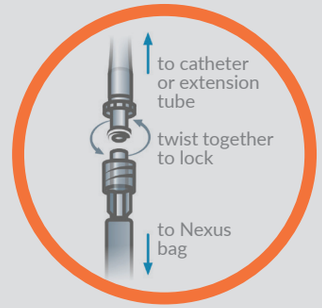
Nexus Nephrostomy bags come in boxes of 10.
Each bag comes in a sterile pouch and feature a soft fabric backing. They are available in two formats, with a single or twin inlet, the twin inlet is for bilateral patients only.

All **Nexus Nephrostomy bags** feature a night bag connector as standard, simply remove the cap and attach the night bag inlet tubing to the outlet tube of the **Nexus Bag**. Then open the 360-degree lever tap on the **Nexus Bag** to allow link drainage overnight.

Nexus Bags can be worn for up to 7 days and should be changed at least every 5-7 days per the Drug Tariff Guidelines.

Product code	PIP code	Product Description	Quantity	DT PRICE
NX1Bag	423-5594	Nexus Standard Single bags	10 bags	£39.50/pack
NX2Bag	423-5800	Nexus Standard Bilateral bags	10 bags	£44.19/pack

No belt pack included - available separately



All **Nexus** bags have Luer Lock twist connectors to securely attach nephrostomy catheters or **Nexus** extension tubes.

KEY FEATURES:

- Easy open tap with safety lever preventing accidental opening
- Soft fabric backing
- Outlet tap swivels 360 degrees so that it can be worn next to or facing away from skin
- Includes night bag connector

Nephrostomy Bags with extension tubing

NX1Adj
NX2Adj

Our **Nexus Nephrostomy bags** with extension tubing come in boxes of 10.
Each bag comes in a sterile pouch containing 2 additional inlet extension tubes to increase the length to comfortably fit your catheter without pulling. For use by single or bilateral tube nephrostomy users.

NX1Adj bilateral users will need to wear two bags, one for each of the 2 nephrostomy catheters.

These Nephrostomy Bags with extension tubing contain:

- 10 x Single Sterile Nephrostomy Drainage bags each with night bag Connector attached.
- 1 x short and 1 x long Extension tube included in each sterile peel pouch.

Nephrostomy Fixation

NXBelt

Our full nephrostomy fixation kit allows users to wear nephrostomy bags around the waist, hip or thigh.
Note: the bag must be positioned so urine can flow down into the drainage bag.

Waist/hip: For those who like to wear their bag around the waist or hip, the included waist belt and adjustable height suspenders can be used to position the bag comfortably. The strong elasticated design of the belt can be cut down to size to find the perfect fit.

Thigh: If you prefer to attach your bag around the thigh, the included thigh strap can be used. The strong but lightweight strap has silicone strips, preventing unwanted slipping or folding – ultimately helping your bag stay in place.

For animations and instructions on how to use the **Nexus** fixation system visit www.nephrostomy.co.uk/directions-for-use or see printed directions for use that comes with **Nexus** drainage bags.

It is recommended you have two **Nexus NXBelt** packs so one set can be in the wash whilst one is in use.
